KNOW ABOUT THE SD STEEL SECURITY DOOR

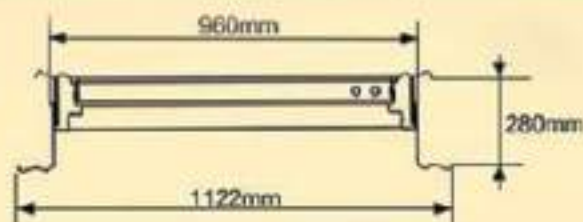

Introducing for the first time in India, a door that comes with your most concerning issue for family and work place that is the security and protection. Security and protection against all adversity and unexpected accidental incidents that is the first and foremost thing that strikes your mind when you are in or away from home and office.

SD STEEL SECURITY DOOR is the first of its kind to offer the highest security system for your family and employees or colleagues without compromising on aesthetics. It has a wood grain finish, which looks perfectly wooden (Door Face of 1.00 mm, Cold Rolled Steel Plate & Door Frame 1.50 mm steel plate). SD STEEL SECURITY DOOR is a precision engineered to last a lifetime with a minimal maintenance. Thanks to multi-layer UV treatment from raw material to door surface.

SALIENT FEATURES THAT MAKES THIS DOOR MOST SECURED & UNIQUE:

- SD STEEL SECURITY DOOR has high corrosion resistance and excellent rub resistance.
- This door is Fire proof, filled with Silicon Aluminum fireproof material.
- This door is Heat Proof up to 900-940 degree centigrade of temperature.
- The colour of the door surface remains bright and new without ever fading in regular weather conditions.
- Each door has a Multi Locking System with minimum 11 lock system and maximum 13 lock system which provides highest security against burglars, with five Master Keys which can never be duplicated.
- Along with two Dummy Keys for the use of Architects, Carpenters in its installation stage & during the interior works before the insertion of Master Key. As for the Peephole, its one that provides a real wide view. The concealed bearing hinges ensure that there are no gaps. Besides, the hinges being on the side, the door can be put directly into the brickwork opening and easily installed. Available in a stunning & broad spectrum array of designs with vibrant wooden looks.
